Test Fire of Akash

142. SHRI SANTOSH BAGRODIA:
SHRI HARISH RAWAT:

Will the Minister of DEFENCE be pleased to state:

(a) whether India successfully test fired the Akash surface to air nuclear capable missile for the third consecutive day on December 15, 2007 from the Chandipur Integrated Test Range;

(b) if so, the degree of accuracy achieved therein; and

(c) how far India still remains from developing its own missile defence system?

THE MINISTER OF DEFENCE (SHRI A.K. ANTONY): (a) Yes Sir. However, Akash is not nuclear capable missile, it is having conventional warhead for engaging aircraft targets.

(b) The accuracy was within the acceptable limits of lethality. The missile has also destroyed the target in subsequent tests.

(c) Technology elements like Radar, Interceptor & Mission Control Center have been developed. Two flight tests, one in exo-atmosphere and the other in endo-atmosphere in interception mode, have been conducted during 2006 and 2007.
